Learnings

- Take your time
- One animation at a time
- Use an outline to debug your animation at each stage
- CSS animations use the browser developer tools
- Don't quit
- What you make is less important than what you learn
- Regular commits / forks
- Don't be married to any one idea

Tips

- Use html classes freely: 'is-mini' 'is-right'

- Don't waste time on the perfect palette at the start

- Use position for positioning and transforms for animations

- Experiment with blend modes

- Shorthand code is hard to manipulate on the fly

- Take the low hanging fruit

- Go with the flow
